# DON'T FALL PREY TO A RANSOMWARE ATTACK

Your data is precious. The digital world has expanded drastically since 2020, leaving you with more digital data to protect than ever. IT Companies bore the burden of doing more with less as face-to-face interactions became digital, and working in a hybrid capacity became a new norm.

Every 11 seconds, [ransomware](#) impacts an American business. Ransomware encrypts your files and makes them unusable, hindering any impacted business's progress. [Education](#) is subject to ransomware more than any other industry. Don't lose your school's progress or confidential information to a ransomware attack; NIC Partners can protect your institution, students and staff from these threats' impact.

## SIMPLIFY YOUR SECURITY

Consolidate, integrate, assimilate and refine. The first step to avoiding an attack is using a single partner for your security needs. That way, there's no finger pointing when it comes to serving your system.

### NIC PARTNERS PROVIDE:

One partner for all your security needs.

Local and cloud continuity

Iron-clad security tested against malware.

Unified customer service and support.

Technology & Security Experts

## TECH TREND-SETTERS

Think connected user experiences. Artificial Intelligence. Real-time data. Unified application and data integration under a single platform as the new standard. The technology industry grows more rapidly than any other, so NIC Partners prioritizes staying ahead of trends.

We provide unified data protection, integrated backup systems, replication and instant recovery. Navigating digital security in 2022 can be daunting: there's more technology at your fingertips than ever. You don't have to tread the waters alone.

## MORE PROGRESS, LESS TIME

Time is a valuable commodity. We integrate products into your system designed to increase your progress without draining your time. The days of individually acquiring and configuring servers, storage, operating systems, security and monitoring components are long gone.

Time is a valuable commodity. We integrate products into your system designed to increase your progress without draining your time. The days of individually acquiring and configuring servers, storage, operating systems, security and monitoring components are long gone.

## HOW WE HELP

We partner with you to provide continuous solutions and backup for your cybersecurity needs. NIC Partners performs all the tasks under one roof, so you never have to wonder who is responsible for what. Let us combine your data protection, analytics, compliance reporting, ransomware detection and DR automation into a single site, cloud or unlimited remote sites.

## READY TO START
